

CUT N' WELD

COST EFFECTIVE PRE-GROMMETED WELDING BLANKETS

By using CUT N' WELD, workers are never inconvenienced because of over or undersize pre-fabricated blankets or curtains. Welders can now cut off only the HOT•STOP® fabric required to provide a safe workplace and reduce waste. With the new 72" width, workers can protect **greater areas** in 25 or 50 yard continuous unbroken lengths.

CUT N' WELD FEATURES

- Heat resistant for temperatures over 1200° F
- Stronger - Excellent performance
- Protect from weld spatter
- Ease of installation - Grommets are 12" apart
- Reduce waste without compromising safety or quality
- Neater, cleaner and more professional
- Available in medium and heavy weight
- Improved safety conditions
- Width of 72" provides greater area protection
- Grommets available along 1 or 2 sides
